## EDUCATION

UC Merced, Merced, CA  
GPA 3.96 | Bachelor of Science in Computer Science and Engineering

May 2026

## TECHNICAL SKILLS

**Languages:** C, C++, CSS, HTML, Java, JavaScript, Python, SQL, TypeScript, WASM, and YAML  
**Frameworks:** Bootstrap, Django, Django REST, Flask, Next.js, React.js, Tailwind CSS, TensorFlow, and Vue.js  
**Developer Tools:** AWS, CUDA, Docker, Firebase, OpenCV, Pandas, PyTorch, and Stripe

## EXPERIENCE

**Google Developer Group** September 2024 - Present  
*Software Engineer Project Lead* Merced, CA

- Built a financial education platform for analyzing trading habits and providing retail investors with insights and feedback
- Coordinated **3** cross-functional teams and led a team of **45** student developers nationwide using **Agile** methodology, employing **Jira** to foster a collaborative environment
- Integrated real-time market data using **Alpaca Markets** API
- Deployed **cloud infrastructure** using **Amazon Web Services** (AWS) on EC2 instances

**Department of Homeland Security** June 2024 - August 2024  
*Software Engineer Intern* Washington D.C.

- Collaborated within an **Agile** DevOps team, leveraging **Jira** for sprint planning, while utilizing iterative development and continuous feedback to enhance **CI/CD** processes and **Docker** container management
- Refactored GitLab **CI/CD** pipeline by moving **3** severity scans to an external shell script
- Implemented a new pipeline stage in GitLab **CI/CD** to automatically comment on existing vulnerabilities in merge requests, enhancing visibility of security issues during code reviews

## PROJECTS

**DjN Data Visualizer** | *Django, Docker, Next.js* September 2024

- Utilizes **TypeScript**, **Next.js**, and **Chart.js** on the frontend, along with **Redux** for state management
- Implements **Django REST framework** to serve data to the frontend via API endpoints
- Containerized the application with **Docker** for automated deployment

**ByTech** | *Firebase, Next.js, OpenAI, React, Tailwind* August 2023

- Enables Computer Science teachers to create classes and assignments, and uses **OpenAI** API to automate creation of assignment test cases
- Utilizes Google **Firebase** for storing accounts, classes, and assignments
- Compiles **Python** into **WASM** to run in a browser

**WildEyeAI** | *Flask, Next.js, React, Tailwind, TensorFlow* July 2023

- Identifies movement using image subtraction techniques, submits frames with detected movement to AI image classification model, then sends a POST request to a **Flask** server to store the image
- Trained using the **TensorFlow** Inception\_V3 model

**Crescent Novels** | *AWS, Django* June 2020 - June 2023

- Developed full-stack features, functionality, and user interaction features using **Django**
- Deployed website using **Amazon Web Services** (AWS) on EC2 instances
- Grew website to over **500** active users

## AWARDS

- **National Merit Scholarship Finalist** 2023
- **HackMerced IX** - 2nd place - \$1000 awarded 2024
